

Dunamoss Fleet Coolant

TECHNICAL DATA SHEET

DUNAMOSS FLEET COOLANT is a Ready-to-Use coolant with multi-functional corrosion and scale inhibitor chemical designed for fleet engine cooling systems.

Applications

Dunamoss fleet coolant is a coolant with a chemistry which is designed to be used in a wide range of fleet and transport equipment

The DUNAMOSS FLEET COOLANT is a ready to use product and requires no additional dilution with water

Performance Features and Benefits

Used for the control of corrosion, scale and fouling in closed cooling systems that operate under high heat transfer conditions.

- Provides infield protection against cavitation & erosion-corrosion
- Prevents overheating by reducing the formation of scale and sludge deposits in cooling systems
- Extends the life of cooling systems
- No deleterious effects on non-metallic (elastomer) cooling system components

Typical Replacement Cycle

Monitor coolant and change fluid as necessary every 50.000 km of service life.

Specifications and Approvals

Dunamoss fleet coolant meets the following engine coolant specifications:

ASTM D 1384

DUNAMOSS FLEET COOLANT protects metals in engine cooling system from corrosive attack.

Health & Safety

Guidance on Health and Safety is available on the appropriate Material Safety Data Sheet, which can be obtained from your representative.

Protect the Environment

Take used coolant products to an authorized collection point. Do not discharge into drains, soil or water.

Extended Shelf Life

When kept sealed in the original shipping container and stored under cover, away from direct sunlight this product has a two-year shelf life. Product should not be left in open unsealed containers due to possible water loss and contamination

Typical Physical and Chemical Characteristics

Dunamoss Fleet Coolant	Method	Units	Performance
Appearance	Visual		Red clear liquid
pH (as sold)	ASTM D 1287		10.0 – 11.0
Specific Gravity	ASTM D 1122	kg/L	1.000 – 1.010

These characteristics are typical of current production. Variations in these characteristics may occur.
